THE FORUMS (*level 1*)**

PRIORITY LEVEL OF ACTIONS WHERE THE PARK IS LEADER

Three priority levels have been established :

1. **High priority**: these are the actions that have to be started first, because the Forum deemed them very important, and because technical, administrative and economic conditions to carry them out are in place (feasibility conditions).
2. **Medium priority** : these are the actions to set off once the high priority actions have been implemented and/or whenever feasibility conditions are in place.
3. **Low priority**: these are the actions that – at the Strategy approval moment – are not deemed strategic of feasible. They are put in “stand by”, waiting for one or more conditions that made them rank low to change (i.e. if funding for their implementation is found).
